

Instructions of how to use the Decoder

Requirements

RoB files:

- Ensure that the input file is a Text file

Remote DTC files:

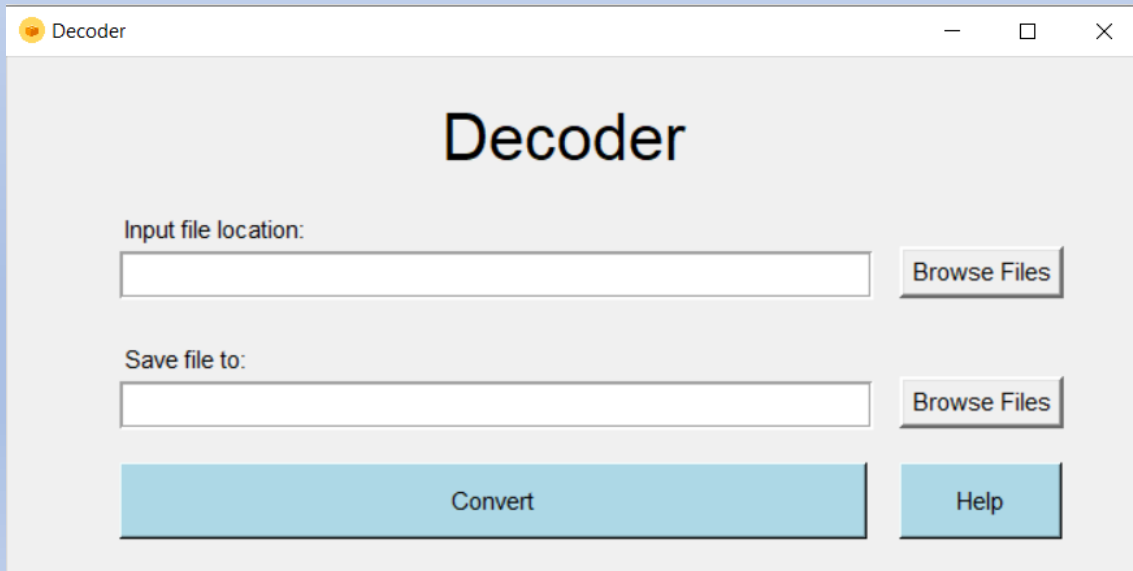

- Ensure that the input file is an Excel file

Step 1:

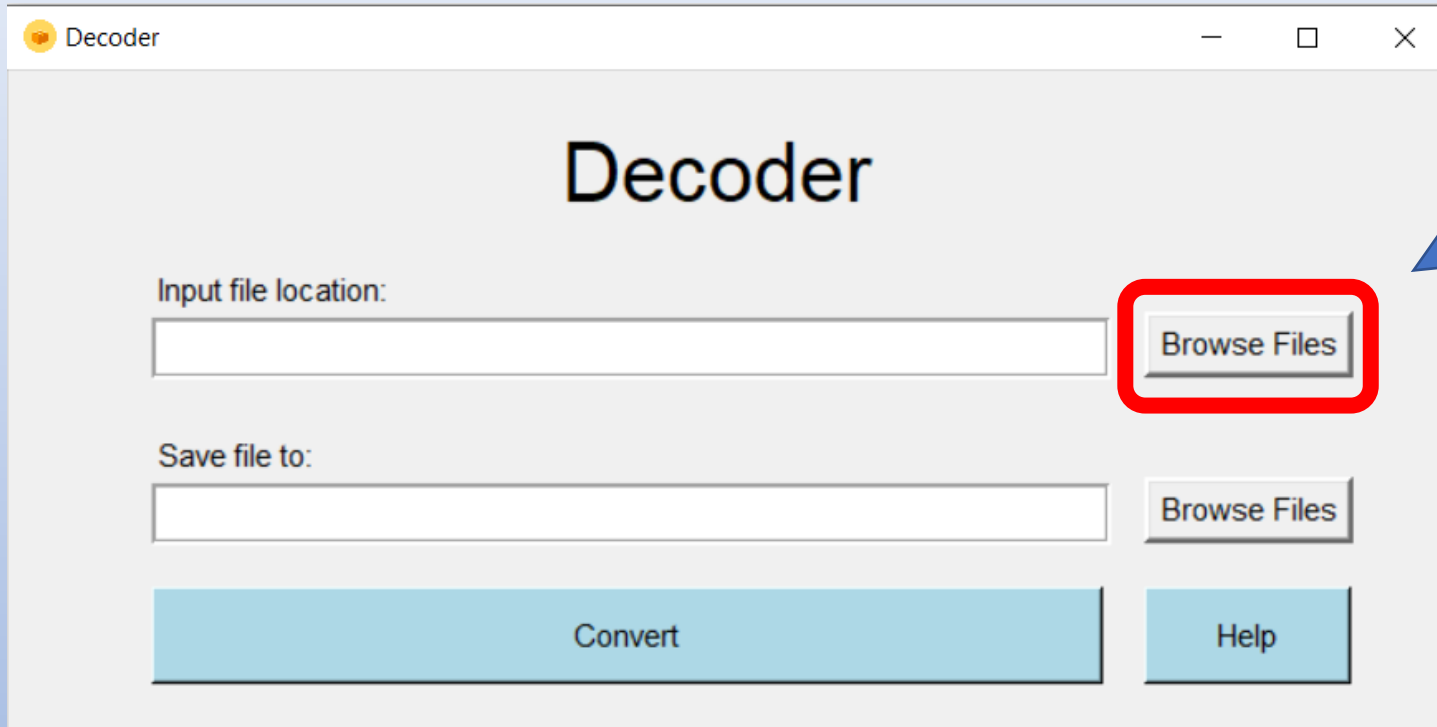

Click on 'Decoder.exe' to open the application

Decoder application will open

Step 2:

Decoder

Input file location:

Save file to:

Browse Files

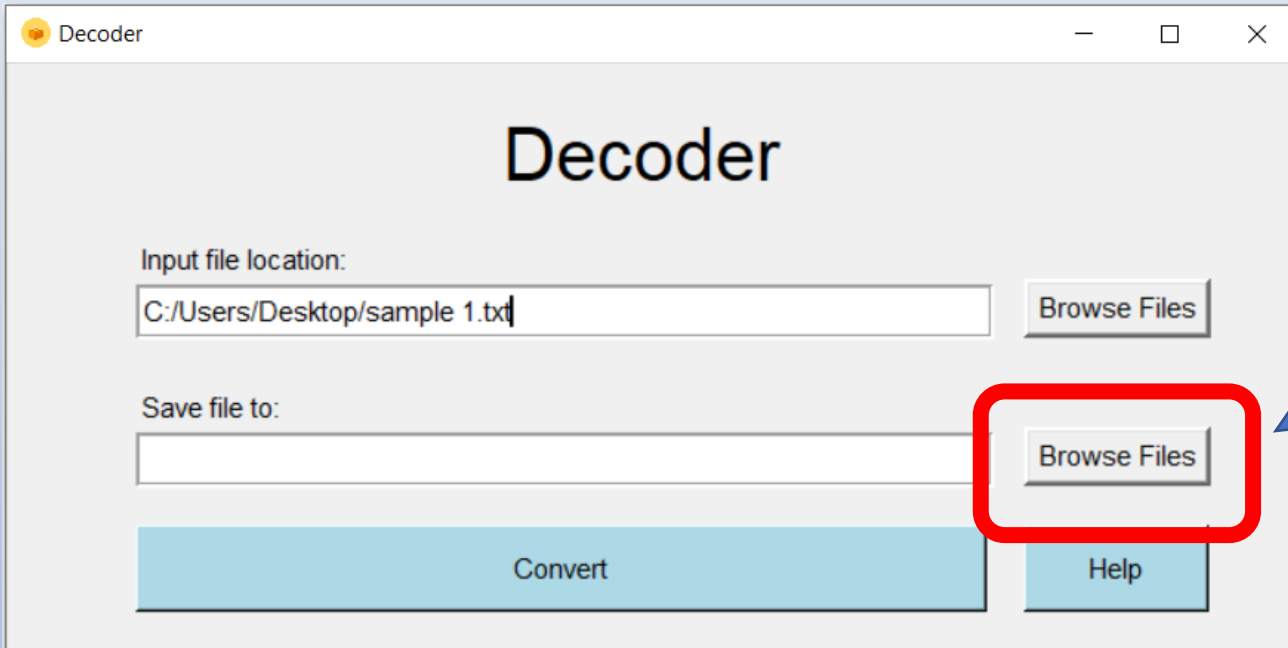

Browse Files

Convert

Help

Click on 'Browse Files' and select the Text/Excel file or type in the full address in the box provided

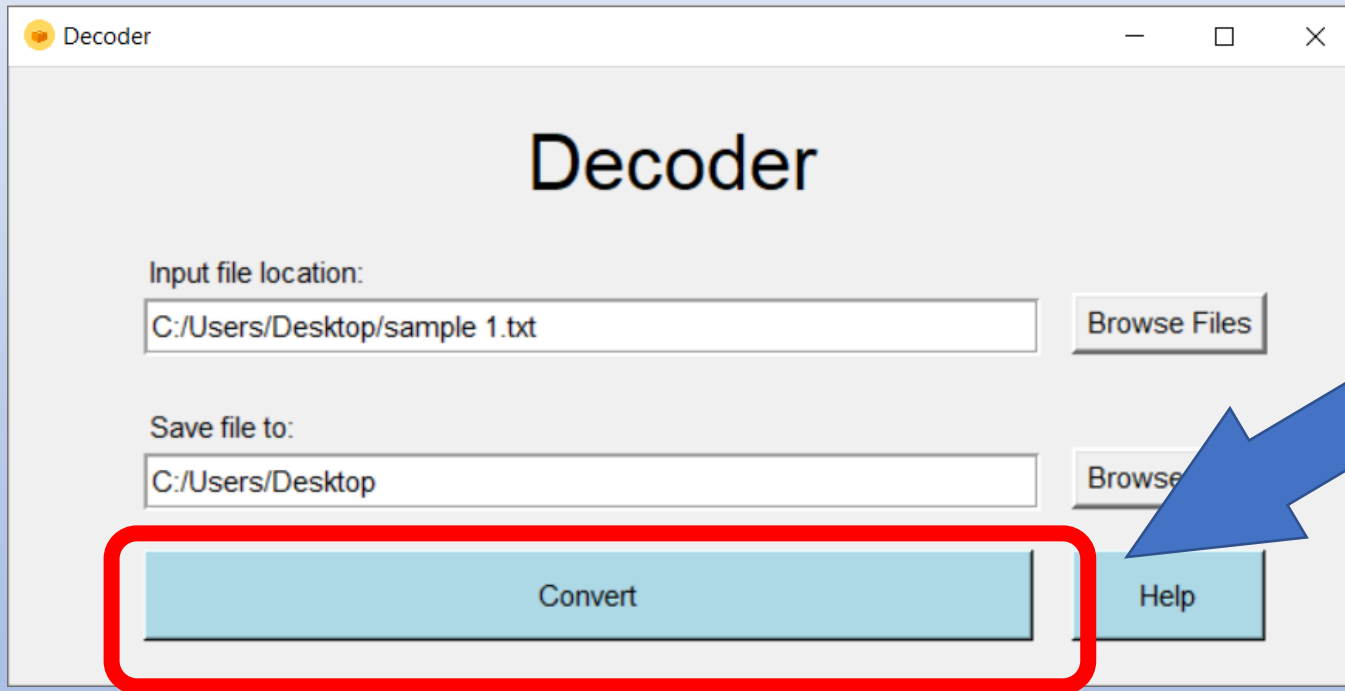

Step 3:

The screenshot shows a window titled "Decoder" with a yellow icon. It contains two input fields and several buttons. The first input field is labeled "Input file location:" and contains the text "C:/Users/Desktop/sample 1.txt". To its right is a "Browse Files" button. The second input field is labeled "Save file to:" and is empty. To its right is another "Browse Files" button, which is highlighted with a red rounded rectangle. A blue arrow points from the text on the right towards this button. At the bottom of the window are two large buttons: "Convert" and "Help".

Click on 'Browse Files' or type in the full address of the folder you would want to save the output Excel file in

Step 4:

Once you have selected a text file and a destination to save the output, click on the 'Convert' button

* Refer to next slide if a warning appears

Warnings:

You have not selected a Destination folder to save the output Excel file at.

You have not selected an Input file, or you have selected a file that is not the correct file type.

You have not selected a Text file and a Destination folder to save the output Excel file at.

The app does not have permission to access the directory

Step 5:

Wait for the Excel file 'RoB_DTC-(Input filename)-(Date)-(Time)' / 'Remote_DTC-(Input filename)-(Date)-(Time)' to open

Step 6:

Repeat steps 2 to 5 to convert more files

Expected types of output for Text file:

Positive Response: Name of RoB and hex data

VIN DISCREPANCY ABNORMALITY DETECTION									
Record #1									
Timestamp		Length	Trip Counter		Time Counter				Master Sync Info
0x05	0x01	7	7		22200				0x01
Accumulated Distance		Length	Unit	Cumulative Mileage					
0x05	0x02	0x04	0x01	0x00	0x00	0x00			
Time		Length	Year	Month	Day	Hour	Minute	Second	
0x05	0x07	6	21	3	16	0	28	19	
+B voltage		Length	Voltage Data						
0x50	0x01	0x02	0x06	0xE3					

Negative Response: Name of RoB and reason (all negative responses will be collated and appear at the bottom of the Excel file)

NEGATIVE RESPONSES:						
	Communication blackout from BDB: Conditions not correct					
	VIN discrepancy abnormality detection: Conditions not correct					

Expected types of output for Excel file:

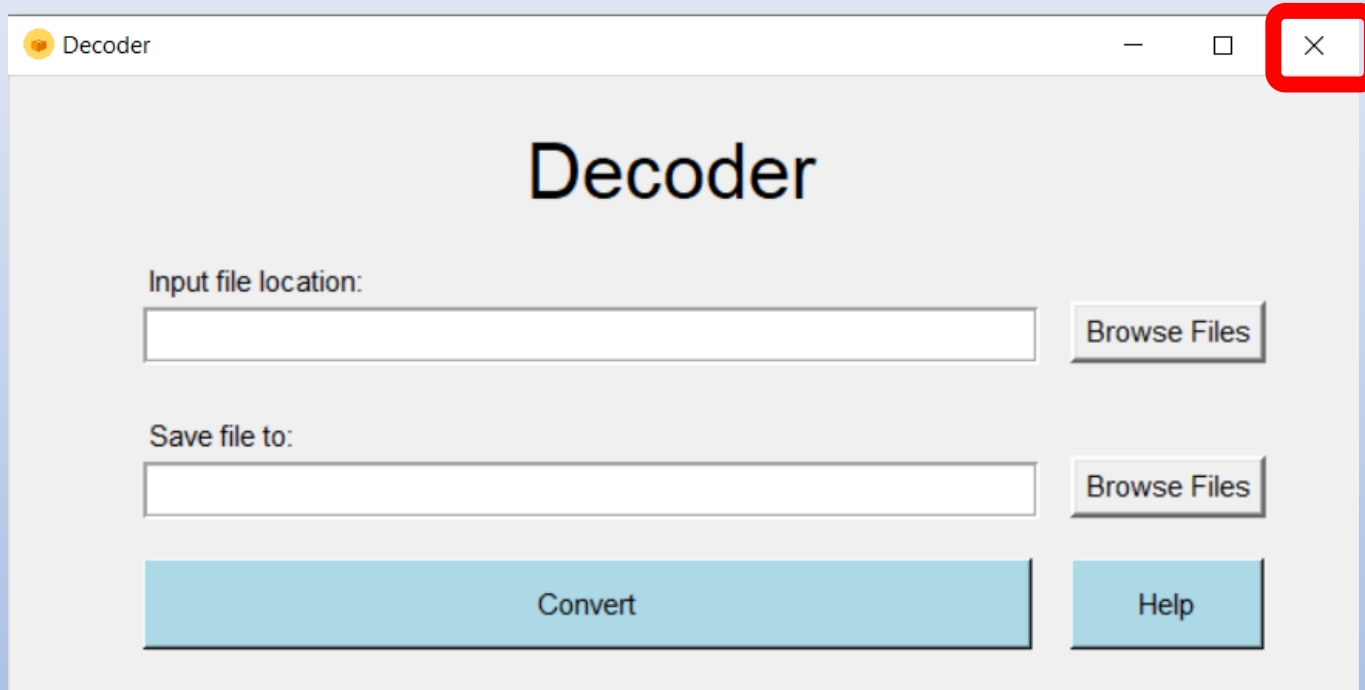

Positive Response:

Phase 5 (standard)			
Record #1			
ECU	0x10	Response	Normal
SID	59	Sub-Function	02
Number of DTC	2	DTCStatusAvailabilityMask	ff
DTC		Status	
0x011015		af	
0x010014		af	

Negative Response:

Phase 5 (standard)			
No DTCs found in Phase 5 (standard)			

Step 7:

Close once you have finish converting all the necessary files to exit the application
